

who is **NILE** ?

WE ARE *problem solvers.*

EVERY PROJECT IS AN OPPORTUNITY TO
SHOW CLEAR RESULTS.

The team at Nile digs eagerly into the details of each project to understand the issues, roadblocks and opportunities it presents. The results we execute showcase our understanding of the many complex considerations that our clients face and our ability to deliver for them.

WE ARE *realists.*

TIME ISN'T WASTED WITH HEADS IN THE
CLOUDS OR BURIED IN THE SAND.

We do not suggest ideas that are out of reach for our clients or ignore the critical details that they count on us to deliver. We make sure to have a thorough understanding of the project so we can help our clients distinguish and move between their needs, wants, obstacles and dreams.

WE ARE *teammates.*

ALL SUCCESSES AND FAILURES ARE
EQUALLY SHARED.

The artistry of an architect only works when the study of a surveyor and the systems of an engineer support the vision. Every project is a collaboration and we rely on the expertise of everyone involved to carve out the best results. Our architects and engineers collaborate daily on the belief that when our clients are successful, so are we.

WE ARE *effective.*

A SUCCESSFUL PROJECT BEGINS WITH
A WELL DEFINED ROAD MAP.

Our team brings many, many years of project delivery experience. We know the markets we serve and are engaged in the best practices taking hold throughout the industry. We are focused, delivering successful projects everywhere, every day.

WE ARE *people.*

WE BUILD RELATIONSHIPS AND
TAKE PRIDE IN WHAT WE DO.

When clients commit, they do not commit to the founders who have long since retired. They commit to our staff, because they like them and find confidence in them. Clients will know the people who will get the job done, who will fight hard to succeed for them, and enjoy the camaraderie of the team.

WE ARE *storytellers.*

WE ARE A COMMUNITY STRENGTHENED
BY SHARED EXPERIENCES.

A building's value is enhanced only after we let go of it. We want to showcase how each project is envisioned, the journey to create it, and the stories that emerge in the hands of its end users. Buildings have no value without purpose and use. We are promoters of our clients and excited to share their successes when the project is complete.

WE ARE *intentional.*

OUR STRENGTH IS THE DIVERSITY
OF OUR WORK.

Our firm is a place where ideas grow and potential is explored across many landscapes. While we do maintain focal areas, we purposely and strategically cultivate a diverse portfolio of work believing our projects are stronger for the influence of the other markets we serve.

WE ARE *interested.*

WE ENGAGE EACH CLIENT IN A ROBUST
ONGOING DIALOGUE.

The priorities of clients vary so we must listen to them! Nile actively engages and listens to the priorities, ideas and needs of our clients. We build long term relationships by prioritizing the value of their interaction and invite clients to the table continuously.

WE ARE *wife.*

WE ARE NOT A SERVICE, BUT A
COLLECTIVE.

As clients engage us, they expand our reach like the tributaries connecting along a river define direction and growth. Our employees encourage a voice, a shape, and a culture. Nile is not service, but rather the collective lens through which we see the experience of all who are involved.
